

Get your forklift battery chargers up off the floor and into a safe, fixed spot. The Dyna-Rack Charger Stand is a welded steel platform sized to hold one or more chargers at a working height, with anchoring slots that lock the charger down and a floor-anchor point that keeps the whole stand planted. Rounded shelf corners, a tough powder-coat finish, and pre-set mounting holes for cable retractors and SB connectors round it out. (Chargers sold separately.)

SKU	Shelf Width	Shelf Capacity
DR-C-24	24"	800 lbs
DR-C-36	36"	800 lbs
DR-C-72	72"	1,200 lbs

Forklift Battery Charger Stand

- | | |
|--|--|
| 1. Cable Retractor Pogo Stick mounting holes (sold separately) | 3. Charger anchoring slots, accomodates most makes of chargers |
