Truck Tire Stack Rack

Dyna-Rack's truck tire stack racks make storing truck tires easier, safer, and more efficient.

These heavy-duty stack racks allow storage of large tires vertically to make better use of limited space, move a loaded rack to improve efficiency, and eliminate material-handling issues related to storing truck tires.

With removable and replaceable posts, these racks disassemble for nested storage when not in use, making it easier to store the storage equipment itself.

With a capacity of 3,000 lbs for each rack and the ability to stack four high a full stack of Truck Tire Stack Rack's can store 20' of truck tires in a 40"x92" footprint.

Don't let truck tires roll all over you—use a Truck Tire Stack Rack.
